About us

Our comprehensive portfolio includes medical devices, antiseptic and disinfectant solutions, wet wipes, and other healthcare essentials designed to meet the evolving needs of hospitals, clinics, laboratories, and healthcare institutions. Every product is developed with a strong focus on quality, safety, regulatory compliance, and innovation.

With state-of-the-art manufacturing facilities, stringent quality assurance systems, and a highly experienced team, we ensure consistency, reliability, and excellence in every product we deliver. Our commitment to operational excellence, customer satisfaction, and continuous improvement has enabled us to build lasting relationships with partners and healthcare professionals worldwide.

At Sceptre Medical, we believe that quality is more than a standard—it is a commitment. Through dependable products, responsive service, and ethical business practices, we strive to contribute to better healthcare outcomes and safer communities.

Quality in Every Product. Trust in Every Partnership.

OUR PRODUCTION FACILITY

Manufacturing wipes, disinfectants, antiseptics, medical devices, and cosmetics requires streamlined production facilities, advanced machinery, and skilled professionals. Our manufacturing units located in Sonipat, Haryana, are spread across a massive area of 1,00,000 sq ft. with the facility of class 10000 clean room. To ensure high-quality output and hassle-free production, we have streamlined the manufacturing process of producing wet wipes and liquid formulations into five simple steps:

1. Consultation

At Sceptre, we provide end-to-end, 360° consultation to understand your product requirements in depth. From product conceptualization to packaging strategy, we offer expert guidance at every stage. Our team combines technical expertise, industry insights, and agile execution to transform your vision into a viable, market-ready solution—efficiently and on time.

2. Formulation

Once we understand your requirements, our highly qualified and experienced R&D team develops optimized formulations tailored to your product goals. We source premium-grade raw materials and functional ingredients, carefully selected for performance, safety, and regulatory compliance, to deliver effective and stable formulations.

3. Production

Our state-of-the-art manufacturing facility is equipped with advanced, automated machinery and modern utilities, enabling us to handle high-volume production with consistency and flexibility. Robust production planning, process validation, and capacity scalability ensure timely delivery without compromising on quality.

4. Quality Check

Quality is integrated at every stage of manufacturing. Our facility follows a stringent multi-level quality assurance system in alignment with international standards including ISO 13485:2016 and GMP guidelines. From raw material inspection to in-process controls and finished product evaluation, our quality control experts ensure product safety, efficacy, and consistency through validated methods and calibrated equipment.

5. Packaging

We offer a wide range of primary and secondary packaging solutions designed for functionality, convenience, and brand differentiation. Options include cross-fold pouches, canisters, flow packs, single tissue packs, refill pouches, and more—available in various sizes from 100 ml to 5 liters. All packaging materials are selected to ensure product integrity, shelf life, and compliance with regulatory requirements.

6. Microbiology Laboratory

Expertise in Microbial Detection and Identification

Our advanced Microbiology Laboratory is equipped to perform a comprehensive range of microbiological analyses for raw materials, in-process samples, and finished products. Using validated methods and state-of-the-art technologies, our skilled microbiologists ensure accurate detection and identification of microorganisms, supporting product safety, quality assurance, and regulatory compliance.

MEDICAL DEVICE**

TAUROCATH™

TAUROLIDINE + HEPARIN + SODIUM CITRATE LOCK SOLUTION
VASCULAR ACCESS DEVICE LOCK SOLUTION

Product Overview

A sterile, non-antibiotic, triple-action catheter lock solution containing:

- Taurolidine 1.35% – Broad-spectrum antimicrobial agent
- Sodium Citrate 4% – Effective anticoagulant
- Heparin 100 IU/mL – Potent anticoagulant to prevent thrombus formation

Designed for use in patients with central venous catheters undergoing:

- Hemodialysis
- Parenteral nutrition
- Oncology treatments

Key Benefits

- Infection Prevention: Active against a wide range of Gram-positive and Gram-negative bacteria, fungi, and biofilm.
- Maintains Catheter Patency: Dual anticoagulants (citrate & heparin) help prevent occlusion.
- Non-antibiotic Formula: Reduces the risk of antimicrobial resistance.
- Safe & Biocompatible: Well-tolerated in adult and pediatric patients.
