About us

Our comprehensive portfolio includes medical devices, antiseptic and disinfectant solutions, wet wipes, and other healthcare essentials designed to meet the evolving needs of hospitals, clinics, laboratories, and healthcare institutions. Every product is developed with a strong focus on quality, safety, regulatory compliance, and innovation.

With state-of-the-art manufacturing facilities, stringent quality assurance systems, and a highly experienced team, we ensure consistency, reliability, and excellence in every product we deliver. Our commitment to operational excellence, customer satisfaction, and continuous improvement has enabled us to build lasting relationships with partners and healthcare professionals worldwide.

At Sceptre Medical, we believe that quality is more than a standard—it is a commitment. Through dependable products, responsive service, and ethical business practices, we strive to contribute to better healthcare outcomes and safer communities.

Quality in Every Product. Trust in Every Partnership.

A Well Recognized Manufacturing Unit

Sceptre manufacturing plant has been built in compliance to the laws articulated by the Ministry of Corporate Affairs, Government of India. We had to go through various legal checkpoints established by the Indian government to be able to produce such an extensive collection of cosmetic/pharmaceutical products at such a massive scale.

We, at Sceptre Medical, believe in transparency. Here are some of the major licenses our company has earned.

WET WIPES RANGE

SCÉPTRE™

CHLORHEXIDINE BATHING RANGE

Safety

Scéptre's Chlorhexidine Bathing Range contains chlorhexidine digluconate which reduces harmful bacteria that can be found on skin whilst binding to the skin for many hours after application to provide residual protection

Quick and Easy to use

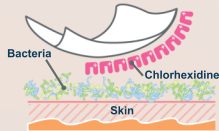

Pre-moistened wipes eliminate the need for conventional patient cleansing methods, reducing preparation time & improving caregiver efficiency.
More professional & concise.

Reduces Microbial Transmission.

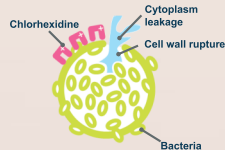

Improved patient cleanliness reduces the number of microorganisms available to transfer to healthcare workers, visitors and the environment.

Wiping with **Chlorhexidine Digluconate** is proven to reduce the spread of **"Pathogens"** in healthcare settings. Current evidence supports the effectiveness of Chlorhexidine wipes in an intensive care, hospital and pre-admission setting.

Why Chlorhexidine Digluconate is effective :

The positively charged Chlorhexidine molecule is attracted to the negatively charged cell wall of the bacteria.

The chlorhexidine binds to the cell wall causing it to rupture, leading to cytoplasm leakage, lysis and cell death.

Positively charged chlorhexidine molecules bind to the proteins in human tissues which consequently releases them slowly to provide a layer of prolonged protection.

PHMB RANGE

Excellent Microbial Activity

Polyhexamethylene biguanide hydrochloride (PHMB) is a cationic biocide with excellent antimicrobial activity, chemical stability, low toxicity and reasonable cost. PHMB is a disinfectant with a broad spectrum of activity against bacteria, viruses and fungi, inducing cell death by disrupting cell membrane integrity.

Safety

PHMB has been reviewed by US EPA and noted as having very low aggregate risk of adverse health effects to the public or environment. It has been proclaimed a safe product for the various application areas viz. human hygiene, veterinary hygiene, food and feed areas, drinking water etc. PHMB is free of heavy metal and phenol compounds having non-corrosive, non-toxic, environment friendly properties.

Application

Scepto-Derm range offers time saving and thorough cleansing without additional rinsing with water. Particularly suitable for bedridden & immobile patient. The antimicrobial efficacy serves the application within the body washing of MRE contaminated patients.

PRODUCT CODE: MD-03-002

KLOR-KLEEN H®

Product Description

Klor Kleen (H) Wipes are advanced hydrogen peroxide-based disinfectant wipes designed for high-level surface and equipment disinfection. The product combines the oxidizing power of hydrogen peroxide with the antimicrobial effect of silver nitrate, making it effective against a broad spectrum of microorganisms. Suitable for use in critical healthcare settings such as ICUs, OTs, dialysis units, and laboratories.

Composition

Each wet wipe contains:

Hydrogen Peroxide Solution (20g of 50%) equivalent to 10% w/v

Silver Nitrate I.P. 0.01% w/v

Purified Water I.P. q.s.

Excipients q.s.

UNIQUE RESEARCH PRODUCT FROM UK

SCEPTRE™

GERMERASE PRODUCT RANGE

GermErase is a unique and patented formulation based on well-known Quaternary Ammonium Compounds (QUATS) blended in such a way as to provide unrivalled efficacy in ultra-low concentrations.

Composition

Benzalkonium Chloride Solution
Didecyl Dimethyl Ammonium Chloride
Chlorhexidine Digluconate
Chlorocresol (p-Chloro-m-cresol)
Lauramine Oxide and Purified water

This product has been tested to European standards EN1276, PAS2424, EN13624 & EN14476.

Works Harder up to 99.99% effective against bacteria, fungi and viruses (ins. SARS-CoV2)

PRODUCT RANGE:

Hand Rub, Hand Wash, Surface Disinfectant, Shampoo Cap, Wash Gloves.

Pack Size: Customizable

SQ53/DORBIMEX SOLUTION

Composition:

Benzalkonium Chloride Solution, Didecyl Dimethyl Ammonium Chloride, Polyhexamethylene biguanide, Bronopol, Chlorocresol (p-Chloro-m-cresol), Purified Water.

Technique of using SQ53:

- SQ53 was used at two time lines:
- As an adjunct to cleaning the site of puncture during the insertion of a CVC as well as
- Cleaning of the site, the catheter and hubs every third day.

Salient Features:

- Presenting the most potent weapon to assist in fighting the most dreaded infections.
- SQ53-Invented in a world class lab by world famous researchers.
- Patented Formula.
- Powered by robust research.
- Proven by clinical studies in prestigious.
- Indicated in achieving a sterile field for all invasive and non invasive medical procedures.

PRODUCT CODE: AS-01-025

SQ53IC WIPE
